

**KEY INVESTOR INFORMATION DOCUMENT**  
**Vermeer Global Fund**  
**ISIN: IE00BZ000X72**

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

**Vermeer Global Fund (the “Fund”) – Class B Sterling Accumulating**

A sub-fund of Vermeer UCITS ICAV (“ICAV”) which is an open-ended umbrella type investment fund with segregated liability between its sub-funds. Vermeer Investment Management Limited is the Investment Manager to the ICAV.

**OBJECTIVES AND INVESTMENT POLICY**

**Objective**

The investment objective of the Fund is to achieve long-term capital growth.

The investment process entails current value and returns, future strategy and trends and the analysis of potential events.

**Investment Policy**

To do this the fund invests in the shares of a diversified range of global Companies with a broad range of market capitalisations.

Dividend Income that the Fund receives is automatically reinvested in to the Fund and is thus part of the share value.

The Fund’s investments will be limited to recognised markets, as detailed in the Prospectus for the ICAV.

Further information on the Fund’s investment objective and policy can be found in the Prospectus at [www.vermeer.london](http://www.vermeer.london).

**RISK AND REWARD PROFILE**

This indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The lowest category does not mean risk free as all investments involve risks. This Fund is ranked 6 because it invests primarily in equities which may have higher levels of price fluctuation than other types of securities.

Please note that higher possible gains generally also imply higher possible losses. The lowest risk rating does not mean that the Share Class is free of risk.

The Share Class's position on this scale is a reflection of the risk inherent in the Share Class under past market conditions. It does not reflect the risk inherent in any future circumstances or events that differ from what the Share Class has experienced in the past.

Additional risks are detailed in the Prospectus. This list does not purport to be exhaustive and risks of an exceptional nature may arise from time to time. As this Fund has such a broad selection of investment choices, there are many factors that could affect performance. These could include changes in the economic environment between and within the countries that the Fund has invested in, the performance of different industrial sectors, and individual securities.
